# CRISP

Coral Reef InitiativeS for the Pacific  
Initiatives Corail pour le Pacifique

The CRISP Coordinating Unit (CCU) was integrated into the Secretariat of the Pacific Community in April to insure maximum coordination and synergy in work relating to coral reef management in the region.

**T**he Initiative for the Protection and Management of Coral Reefs in the Pacific (CRISP), sponsored by France and prepared by the French Development Agency (AFD) as part of an inter-ministerial project from 2002 onwards, aims to develop

a vision for the future of these unique ecosystems and the communities that depend on them and to introduce strategies and projects to conserve their biodiversity, while developing the economic and environmental services that they provide both locally and globally. Also, it is designed as a factor for integration between developed countries (Australia, New Zealand, Japan and USA), French overseas territories and Pacific Island developing countries.

## Component 1A: Integrated Coastal Management and Watershed Management

- 1A1: Marine biodiversity conservation planning
- 1A2: Marine Protected Areas
- 1A3: Institutional strengthening and networking
- 1A4: Integrated coastal reef zone and watershed management

## Component 2: Development of Coral Ecosystems

- 2A: Knowledge, beneficial use and management of coral ecosystems
- 2B: Reef rehabilitation
- 2C: Development of active marine substances
- 2D: Development of regional data base (ReefBase Pacific)

## Component 3: Programme Coordination and Development

- 3A: Capitalisation, value-adding and extension of CRISP activities
- 3B: Coordination, promotion and development of CRISP Programme
- 3C: Support to alternative livelihoods
- 3D: Vulnerability of ecosystems and species
- 3E: Economic task force

CRISP Coordinating Unit (CCU)  
Programme Manager: **Eric CLUA**  
SPC - PO BOX D5  
98848 Noumea Cedex  
New Caledonia  
Tel./Fax: (687) 26 54 71  
E-mail: [ericc@spc.int](mailto:ericc@spc.int)  
[www.crisponline.net](http://www.crisponline.net)

The CRISP programme is implemented as part of the policy developed by the Secretariat of the Pacific Regional Environment Programme for a contribution to conservation and sustainable development of coral reefs in the Pacific.

## COMPONENT 1 - PROJET 1A2 Support to Marine Protected Areas

The objective of this project is to reinforce existing MPAs and to create new ones in order to create a wide panel of pilot sites and experiences that will be used as reference or model for the integrated management of marine resources in the Pacific.

Several sites have been identified and the subsequent actions have been planned : support to Aleipata and Safata Marine Protected Areas in Samoa ; support to operational MPAs in the Solomon Islands and Vanuatu (FSP) ; identification of new sites in Tuvalu and Kiribati ; identification and implication of local stakeholders in the Mont Panié area (Northern New Caledonia) ; support to GERSA project on coastal and watersheds management in Vanuatu, Fiji and French Polynesia ; pilot studies for the implementation of Marine Areas Management Plan (PGEM) according to the methods developed in French Polynesia.

This CRISP project was financed by:

Annelcauhat Council of Chiefs

AAA Timber Project

**DECLARATION BLONG MYSTERY ISLAND ADAPTIVE MANAGEMENT PLAN**

Mifala olketa heds blong famili long Annelcauhat area, Aneityum, mifala stap sign andanit ia blong talem sei management plan ia hemi go through long process blong consultation wettem everi member blong komunity mo Vanuatu Fisheries Department, FSP International, FSP Vanuatu, Wan Smolbag Theatre mo hemi reflectem tinktink blong everi community member blong Annelcauhat area.

Mifala i declarem se management plan ia hemi nao officially launched mo hemi kam wan document blong wok blong managem gud olketa risoses blong Mystery island mo Annelcauhat area blong ensurem se yumi save kat wan gudfala life tedei mo tomorrow mo ensurum se olketa future generations blong yumi I save continue blong save kat wan gudfala life.

Document ia hemi signed long \_\_\_\_\_day blong Manis \_\_\_\_\_ Yia 2007

ANELCAUHAT YOUTH ENVIRONMENTAL SERVICE  
“YES” PROJECT

The marine environment is a vital source of livelihood in Anelcauhat. Participants in the PLA workshop conducted between the 25<sup>th</sup> of May – 31<sup>st</sup> May 2006 by FSPV, Fisheries Dept. and Wan Smol Bag has identified the poor waste management in Anelcauhat as a threat to their marine environment as people continue to use the sea as their dumping site.

There this project funded by the UNESCO will be focusing on the control of waste in the village through the expert advice of the Environment Unit and other relevant authorities.

On the 16<sup>th</sup> of November a workshop held by FSPV with the Anelcauhat community, identified rubbish pits as a priority need taking into account the best areas and how to use them. An Action Plan was developed and leading partners are:

“ YES “ ACTION PLAN
